

EBB/Tariff Update

EBB/Tariff Update

- Carolina Gas Transmission is an interstate pipeline and is under the regulations of the Federal Energy Regulatory Commission (FERC).
- We first filed our tariff in November 2006. Since then, all our tariff filings have been paper filed with the FERC.
- FERC issued Order No. 714 on September 19, 2008. It required that all tariffs be filed electronically.
- Our filing on July 29, 2010 was our Baseline filing (our initial electronic tariff filing) with an effective date of August 1, 2010.
- In this filing, we didn't change the content, only the structure.
- For simplification, we moved from a sheet based tariff to section based.

**CAROLINA GAS
TRANSMISSION**
A SCANA COMPANY

EBB/Tariff Update

- **How this helps us:**

- We now only have to change the section instead of multiple sheets.
- We don't have to change the header of the page.
- Easier for submission of filings.

- **How it helps you as customers:**

- At any time, you can see our most updated tariff from any web access device.
- When moving from one page to another, the heading will stay the same instead of revised sheets superseding previous sheets.
- The header information can be viewed in the Public Viewer on the FERC website.
